Restriction Requirement

1. The instant application appears to be in sequence compliance for patent application containing nucleotide sequence and /or amino acid sequence disclosures.

However, applicant is invited to review the instant application to make sure each sequence is identified by the proper SEQ ID NO.

2. Claims 1-39 are pending.

3. This application contains claims directed to the following patentably distinct species of the claimed invention:

Applicant is required to elect one particular antibody that binds TGF β and to provide the following information with respect to the elected species of the antibody:

- A) applicable variable heavy chain SEQ ID NO.;
- B) applicable variable light chain SEQ ID NO.; AND
- C) applicable CDR sequences.

Applicant is required to select: (A) heavy chain SEQ ID NO, (B) light chain SEQ ID NO, AND (C) CDR sequence.

In addition, applicant should indicate which specific antibody designation (e.g. 7A3, 27C1, etc.) the elected species election reads upon.

These species of the antibody that binds TGF β are distinct because each antibody possesses a unique structure as determined both by its heavy and light chain sequence, and by the pairing of those sequences to produce the antigen-binding site. Further, the examination of these species would require different searches in the scientific literature and electronic databases. As such, it would be burdensome to search these species together.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Art Unit: 1644

4. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
